

# The InvestiGator Club®

the place for curious young learners™

Dilly Gator

The InvestiGator Club® Georgia Prekindergarten Learning System is a comprehensive program based on scientific research with proven results. The program uses an inquiry-based learning approach to spark children's curiosity and to challenge them to use their senses, ask questions, and find answers in a supportive, print-rich environment. Young investigators discover their love of learning as they explore life skills through stories, the arts, and imaginative play. Children learn to reason and think like scientists, construct mathematical concepts, appreciate fine art and music, and engage in meaningful conversations. Features:

- Standards-based, integrated curriculum
- Built-in assessment and intervention system
- Family engagement components
- Focus on the whole child
- Ongoing professional development
- Inclusion, dual language, and multicultural relevancy
- Lovable characters add to the power of story
- Camp InvestiGator Summer School Program
