Overview	<p>AlphaSkills Pre-K Curriculum is a comprehensive program based on the most current research about learning in the early childhood years. Each activity for each day is closely aligned to the GELDS, Head Start, and NAEYC standards. The 30 thematic units include activities matched carefully to each instructional area of language and literacy, mathematics, science, and social studies while building on children's' interests and their varying cultural and/or developmental levels. Teachers are provided needed guidance to promote social and emotional development and positive behavior management skills in their learners. Large group, small group, and independent activities during indoor and outdoor times prepare children to learn today as well as be prepared for the future. Parents are provided ways to support learning at home through weekly English or Spanish family literacy kits which are supplemental purchases.</p>

Note: Use of the 30 units over the 36 week school year is left to the discretion of the school/school system. There are several one week units that can easily be spread over a period of two weeks because of the challenge or complexity of the content. Also, most teachers have a few favorite units of their own that they want to utilize, especially around holidays.
