

A NEW Pre-K program designed to develop, inspire, and grow little learners on their way to Grade K.

Welcome to *DIG*!

By balancing developmentally appropriate skills with just the right amount of play, *DIG* supports teachers as they develop, inspire, and grow early learners on their way to K. It's designed with:

- Daily, robust math and literacy instruction.
- Dramatic role play that fosters social relationships and self-regulation.
- Integrated science and social studies themes.
- Focus questions that set the stage for inquiry-based learning.
- Action rhymes, fingerplays, and songs featuring Dr. Jean Feldman.
- Puppets and other developmentally-appropriate, playful materials.
- A comprehensive and ongoing formative assessment path.

Brand New, Comprehensive Pre-K Program

DIG is everything a teacher needs to develop, inspire, and grow children across all learning domains in a balanced way.

Thematic Units

DIG's **eight thematic units** of integrated science, social studies, literacy, and math instruction anchor learning throughout the year and help children make solid and lasting content connections. With each unit lasting four weeks, students have **ample time to dive deeper into various aspects of the theme.**

Social Emotional

Children need stories and models for dealing with feelings and relationships in the classroom. Throughout *DIG*, children have **daily opportunities to explore common social topics** in safe, nonthreatening, and encouraging ways.

Oral Language

Language acquisition is where learning begins, and it starts well before the first days of school. *DIG* draws children in, **motivates them to use new words, and sparks rich conversations**—at school and at home.

Robust Math

A strong foundation in mathematics means earlier success with complex math concepts. That's why *DIG* delivers **robust instruction in foundational math skills** and age-appropriate methods and practices.

Active Literacy

The more actively engaged young children are, the more solid learning becomes. That's why *DIG*'s **meaningful literacy routines feature Dr. Jean and the Letter People**, two perfect partners for building emergent reading concepts.

Differentiation

Pre-K teachers deal with an immense range of ability levels, **from three-year-olds to English Language Learners, and from children with special needs to those who need enrichment.** That's why *DIG* supports teachers with point-of-use strategies each and every day.

Small Group & Centers

Instructional time can take many forms. *DIG*'s **daily, small-group instruction in literacy and math** strengthen, reteach, and extend concepts, while **hands-on Learning Centers** help children practice skills independently.

Family Involvement

Authentic, meaningful home-school connections are critical to the success of any early childhood program. *DIG* **supports teachers in fostering positive family relationships** and provides so many resources to help families become active members of the school community.

Assessment

In order to ensure consistent, upward progress toward kindergarten readiness, teachers must know how well their students grasp skills and content. *DIG*'s **ongoing, program-embedded assessment tools** fully support teachers in progress monitoring, planning, reteaching, and data collection.

Professional Development

DIG helps teachers do big things, too! With **fully supportive teaching resources and flexible training options**, *DIG* delivers guidance that's manageable and easy to use. Call for more details about *DIG*'s:

- Program-embedded tips from the experts
- On-demand, virtual training modules
